KUSH STONE – DIRECT FROM NATURE TO YOU

ABOUT US

Natural Stone Company is the leading marble company in Afghanistan and one of the most competitive world-class stone companies in the region. We focus on mining, processing, and export of top-quality decorative stone, including marble, onyx, and travertine, that is requested by residential and commercial building designers and developers around the world. Natural Stone Company products sell under the brand name of **Kush Stone** globally.

In April 2020, Afghanistan's Ministry of Mines and Petroleum awarded Natural Stone Company two large-scale mining concessions for white travertine, onyx, and pure white marble deposits located in central Afghanistan. With the country's new strict mining regulations, receiving these awards demonstrates Natural Stone Company's economic and financial solidity as well as our extraordinary technical capacity in the eco-sustainable exploitation of large natural stone deposits.

OUR QUARRIES

Natural Stone Company's main source of supply comes from our three very own **quarries** totaling 33 square kilometers. The quality of these decorative stone deposits of white marble, honey and white premium travertine and onyx are excellent. Their chromatic range is well suited for the most demanding international markets. Having our own direct source enables us to guarantee a steady supply of decorative stones, handle large-scale projects, and provide customers with a broader range of products.

OUR FACTORIES

Natural Stone Company has two modern factories that are equipped with the most advanced Italian machines and equipment for cutting and polishing. We commissioned a renowned Italy-based engineering company to design both factories that we built in accordance with European construction and environmental standards in modern industrial parks located in Kabul, Afghanistan. With a production capacity of 40,000 square meters of slab and tiles per month, Natural Stone Company offers products that meet international standards of quality as well as competitive pricing in local, regional, and international markets.

WHY CHOOSE KUSH STONE?

Natural Stone Company products sell under the brand name of **Kush Stone** globally. Kush Stone is symbolic of the commitment to the highest standard of craftsmanship, quality, and design. Any products under the Kush Stone brand have **CE marking** and are **certified** to be environmentally friendly, free of asbestos, and compliant with **international building standards** for both interior and exterior applications. Through our shipping agents and logistics channels, we **ship anywhere** in the world so that our Kush Stone comes **direct from nature to you**.

For more details, please refer to the enclosed leaflet for technical characteristics for each stone.
